

Alyve Technology

Technology that works for schools.

People first

Solutions designed for staff, students and communities.

Proven partner

Trusted by schools across Australia.

Better outcomes

Simpler systems. Stronger schools. Brighter futures.

Alyve Technology combine's technical expertise with a practical, solutions-focused mindset. We understand the complex and often fragmented technological challenges schools can face and work to craft solutions that are streamlined, efficient and cost-effective.

We pride ourselves on being vendor-independent, ensuring that every recommendation is driven solely by what best serves our clients; you won't find us promoting or prioritising any specific brand or product.

We work collaboratively with leadership and operational teams to identify inefficiencies, remove barriers, and implement intuitive, sustainable solutions that align with long-term goals.

From reducing reliance on paper-based processes to supporting the responsible adoption of emerging technologies such as AI, we help our clients to operate with greater clarity, confidence, and efficiency.

Our guiding principle is simple: **technology should enhance people's work, not complicate it.**

OUR SERVICES

01

Managed Print & Document Solutions
